

# Annu Sahray

ROR Developer ( 4+ Years)

E-Mail : sahrayannu@gmail.com

## Objective

A dedicated Ruby on Rails Developer with strong skills in building fast, secure, and user-friendly web applications. Experienced in Rails MVC, RESTful APIs, databases, and modern frontend technologies like React.js, Next.js, Angular, HTML, CSS, and JavaScript. I focus on writing clean code, improving performance, and creating reliable solutions that add real value to the project and business.

## KEY SKILLS

- Critical Thinking
- Team Collaboration
- Strong Communication Skills
- Task Coordination
- Continuous Learning
- Project Management
- Flexibility
- Effective Decision-Making
- Creative Solutions
- Commitment to High-Quality Delivery

## TECHNICAL SKILLS

|                    |                                                                  |
|--------------------|------------------------------------------------------------------|
| Technologies       | Ruby on Rails, HTML, CSS, JavaScript, React.js, Next.js, Angular |
| Database           | MySQL, PostgreSQL, Redis                                         |
| API Development    | RESTful APIs                                                     |
| Project Management | Agile Scrum Methodology, MVC Framework                           |
| Version Control    | Git, GitHub, GitLab                                              |
| Tools              | Sublime Text, RubyMine, Visual Studio Code                       |
| Others             | Linux, Postman, Devise, Jira                                     |

## MY SKILLS

- ➔ Strong knowledge of Ruby, OOP, and error handling.
- ➔ Good experience with Ruby on Rails MVC architecture.
- ➔ Skilled in building and consuming RESTful APIs.

- Experience with PostgreSQL, MySQL, Redis, and SQL.
- Proficient in HTML5, CSS3, JavaScript, React.js, Next.js, and Angular.
- Good understanding of Git, GitHub, and GitLab workflows.
- Experience with Devise, authentication, and security best practices.
- Familiar with Agile Scrum, Jira, and team collaboration.
- Skilled in API testing and documentation using Postman.
- Experience with Linux, RubyMine, VS Code, and Sublime Text.
- Focused on clean code, performance, and problem-solving.

## WORK EXPERIENCE

### Ruby on Rails Developer

(Dec 2023 - Present)

Expandimo Technologies Pvt Ltd

#### Key Responsibilities :-

- Develop and maintain scalable Ruby on Rails applications.
- Collaborate with product managers to gather and implement requirements.
- Collaborated effectively within a team of 5 to 6 members, actively participating in meetings and fostering open communication.
- Optimize database schemas and queries in PostgreSQL/MySQL.
- Create and maintain RESTful APIs for integration with services.
- Conduct code reviews and provide feedback to team members.
- Manage version control using Git.
- Maintain documentation for features and processes.
- Stay updated on industry trends and emerging technologies.
- Developed Web application using MVC framework for back-end, CSS, and HTML frameworks for front-end.

### Ruby on Rails Developer

(Jul 2022 - Dec 2023)

Devzila

#### Key Responsibilities :-

- Designed and developed the user interface using HTML, CSS.
- Actively involved in sprint planning and retro meetings.
- Designed the controller and view part PostgreSQL of the system using scaffolding.
- Developed and tested features in an environment (AGILE) using Ruby on Rails, HTML5, CSS3, and Bootstrap.

- Architecting and implementing new features for the application.
- Reviewing pull requests and managing code deployment.

## RECENT PROJECTS

### WareIQ

**Role :** *ROR Developer*

**Description:** WareIQ is an eCommerce fulfillment services and shipping platform for new age consumer brands. Partner with WareIQ to get access to fulfillment centers across India and enable fastest delivery for your customers.

**Role & Responsibilities :**

- Build and integrate scalable and secure REST APIs for order management, inventory tracking, and shipping logistics.
- Collaborate with product managers and frontend developers to define API requirements and deliver backend solutions.
- Design and optimize database schemas for efficient storage and retrieval of data.
- Create and maintain comprehensive API documentation for ease of integration.
- Monitor API performance and address bottlenecks or errors in real-time.
- Suggest and implement improvements to enhance scalability and performance.

**Tech-Stack:** *Ruby on Rails, RESTful APIs, PostgreSQL, Redis, Devise, React.js, Next.js, Postman, Linux, Git, Jira, macOS*

## **Bricks PMS**

### ***Role : ROR Developer***

**Description:** Bricks offers the best property management system that gives you complete control over your operations. Whether managing a single property or a portfolio, Bricks simplifies tenant communication, lease tracking, maintenance, and financial reporting. It reduces administrative tasks, improves tenant satisfaction, and allows you to oversee your assets more efficiently. With customizable features, Bricks ensures that every aspect of property management is handled smoothly, giving you full control over your properties.

### **Role & Responsibilities :**

- Identify and resolve bugs in the codebase to ensure smooth system functionality and perform ongoing maintenance for stability.
- Design and develop scalable REST APIs to support tenant communication, lease tracking, and maintenance management.
- Worked with frontend developers to integrate Rails REST APIs with React.js and Next.js-based user interfaces.
- Collaborate with frontend developers, QA engineers, and product managers to implement backend solutions and ensure seamless API integrations.
- Design and maintain efficient database schemas for managing property, tenant, and optimizing queries for performance.
- Develop comprehensive API documentation and provide technical support for API integration and troubleshooting.
- Supported frontend integration using React.js and Angular for tenant, lease, and property management modules.

***Tech-Stack:*** Ruby on Rails, RESTful APIs, MySQL, Redis, React.js, Angular, Postman, Linux, Git, Jira

## [Gizmoh](#)

**Role : ROR Developer**

**Description:** GIZMOH is a free social app that allows you to easily connect and engage with your friends and family. Share updates, photos, and messages, and stay connected with the people who matter most. With GIZMOH, you can join conversations, explore new content, and build meaningful relationships, all in one simple, user-friendly platform.

### **Role & Responsibilities :**

- Created REST API consumable for iOS, Android and React App.
- Developed and tested features in an AGILE environment using Ruby on Rails, Fixed complex bugs.
- Scrupulously followed Agile methodology throughout the project, involved in Scrum meetings with the team members for the update on project status using Jira software.
- Responsible for most view/controller changes, as well as model/database integration with other team members.
- Designed and implemented the MySQL schema.
- Wrote services to store and retrieve user data from the MySQL for the application on device
- Created REST APIs consumed by iOS, Android, React.js, and Next.js applications.

**Tech-Stack:** *Ruby on Rails, RESTful APIs, MySQL, React.js, Next.js, Postman, Linux, Git, Trello*

## **Kinetizine**

**Role : ROR Developer**

**Description:** Kinetizine is all about creating easy-to-use, top-notch tools that deliver incredible value without breaking the bank. Their clients love how Kinetizine helps them pinpoint the topics that matter most to their audience, enabling them to engage more effectively.

### **Role & Responsibilities :**

- Design and maintain backend services using Ruby on Rails to manage data flow, user interactions, and content recommendations.
- Build responsive frontend components using AngularJS for a smooth user experience across devices.
- Create and integrate RESTful APIs to enable seamless communication between the frontend and backend.
- Design and optimize database schemas for efficient storage and retrieval of user and content data.
- Collaborate with cross-functional teams to align development goals with business objectives.
- Ensure code quality through regular code reviews and adherence to best practices in software development.
- Collaborate with the UX/UI design team to create intuitive user interfaces that improve user engagement and satisfaction.
- Built and supported frontend components using Angular, React.js, and Next.js for a smooth user experience.
- Participate in agile development practices, including daily stand-ups and sprint retrospectives, to foster a collaborative team environment.

**Tech-Stack:** *Ruby on Rails, Angular, React.js, Next.js, RESTful APIs, MySQL, Postman, Linux, Git, Agile Scrum*

## **REASON TO HIRE ME**

- I like to take a project as a daily challenge
- Time-to-time delivery is my first aim or if I can't then I won't any payment
- I enjoy working with people and like to help anyone.
- I am able to work with others toward a team goal.
- Willing to start work immediately.

## **EDUCATION**

**Bachelor of Computer Science**

Guru Gobind Singh College

**July 2017 - May 2020**

**MA in Public Administration**

Post Graduate Government College

**July 2020 - June 2022**

**PERSONAL DETAILS**

Address : Panchkula

Gender : Female

Language : English, Hindi

**ANNU SAHRAY**
