

Hello. I'm Satinder Ghai,

AI Software Engineer | Full Stack Developer | LLM & Agentic Workflow Engineer

 Phone
+ 91 9876910586

 Email
hellomrsatinder@gmail.com

Summary

Results-oriented AI Software Engineer and Full Stack Developer with 8+ years of experience building high-performance web applications, scalable APIs, and AI-powered workflow systems. Skilled in React.js, TypeScript, JavaScript, Node.js, SQL, Python, OpenAI, LangChain, and modern full-stack development. Experienced in building production-ready prototypes, integrating LLM APIs, designing agentic workflows, automating business processes, and optimizing application performance. Strong collaborator with UI/UX teams, backend engineers, and product managers, with a focus on clean architecture, reliable systems, and user-friendly digital experiences.

<This is/> Technical Skills

 React.js	 Express.js	 TypeScript	 Node.js
 Tailwind CSS	 PostgreSQL	 Next.js	 Redux
 JavaScript	 GraphQL	 MongoDB	 RESTful APIs
 Payment Gateway	 Authentication	 Responsive Design	 Integration
 Claude Code	 N8N Automation	 Python	 LangChain

<This is/> Work Experience

Expandimo Technologies (Feb 2023 – Present)

Senior Full Stack Developer | AI & Automation Engineer

Building scalable TypeScript-based full-stack applications using React.js, Next.js, Node.js, Express.js, and PostgreSQL. Developing Generative AI and LLM-based workflows using OpenAI, LangChain, n8n, Python, and third-party API integrations. Supporting AI deployment workflows, Docker-based setups, CI/CD coordination, and production performance optimization. Supported junior developers through code reviews, technical guidance, debugging, and architecture improvements.

Newton Infotech (Jun 2022 – Jan 2023)

Senior Full Stack Developer | React Native

Xinthe Technologies (Mar 2022 – Jun 2022)

Full Stack Developer

Harbinger (Mar 2021 – Oct 2021)

Software Engineer

Spineor Webservices (Mar 2018 – Mar 2021)

Web Developer

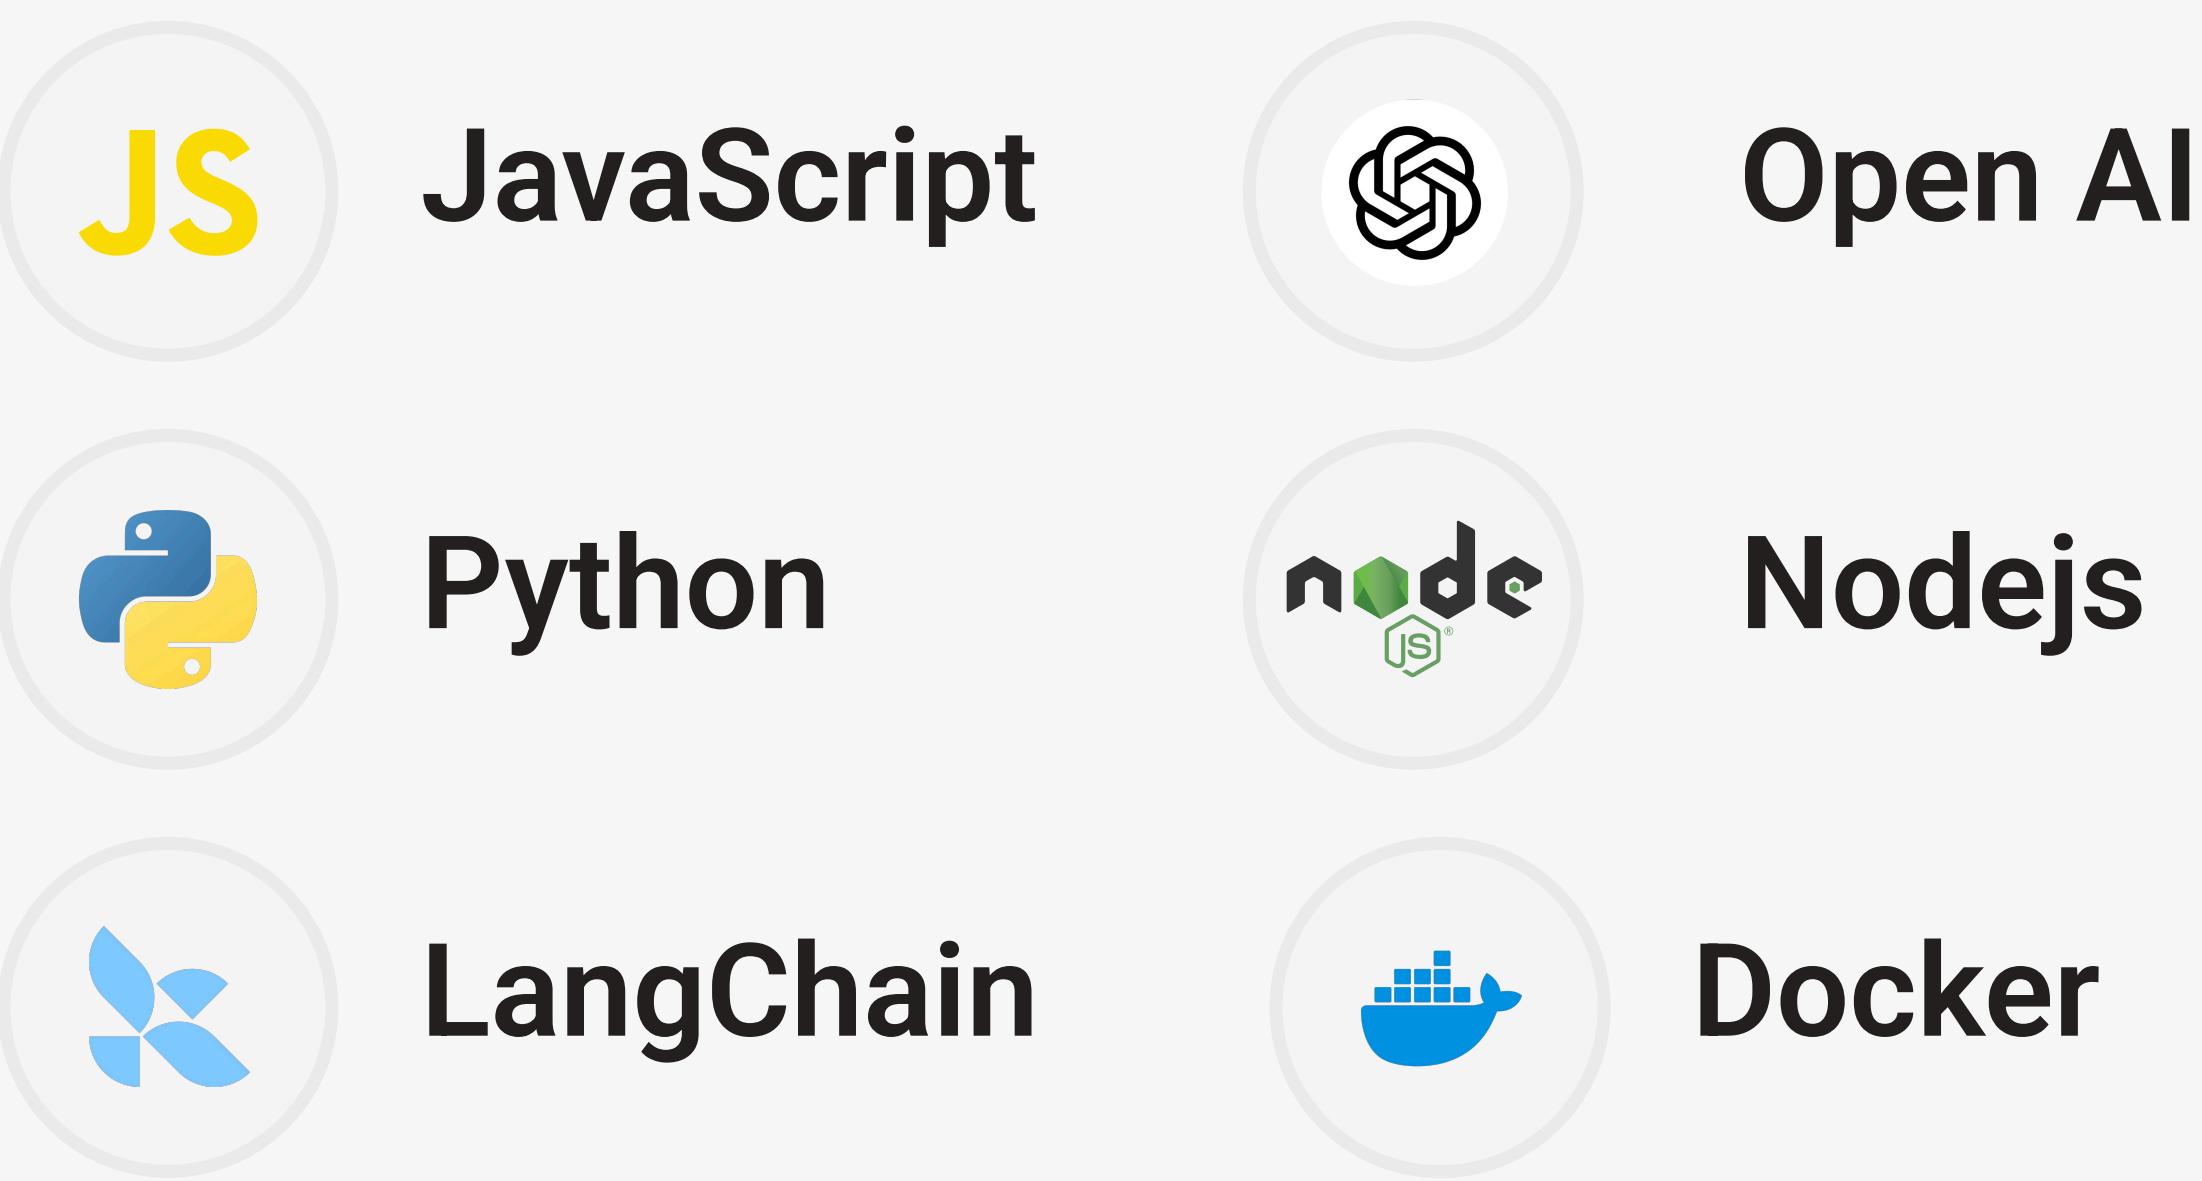

<Victory Code/> Key Projects

LLM-Powered Media Catalog System

LLM Workflow Automation Engineer

Developed a GCP-based content catalog system for AI-generated images and videos tied to chat characters. The workflow minimized redundant content generation by combining vector search with reranking, enabling reuse of existing assests and generating new media only when necessary.

Tech Stack

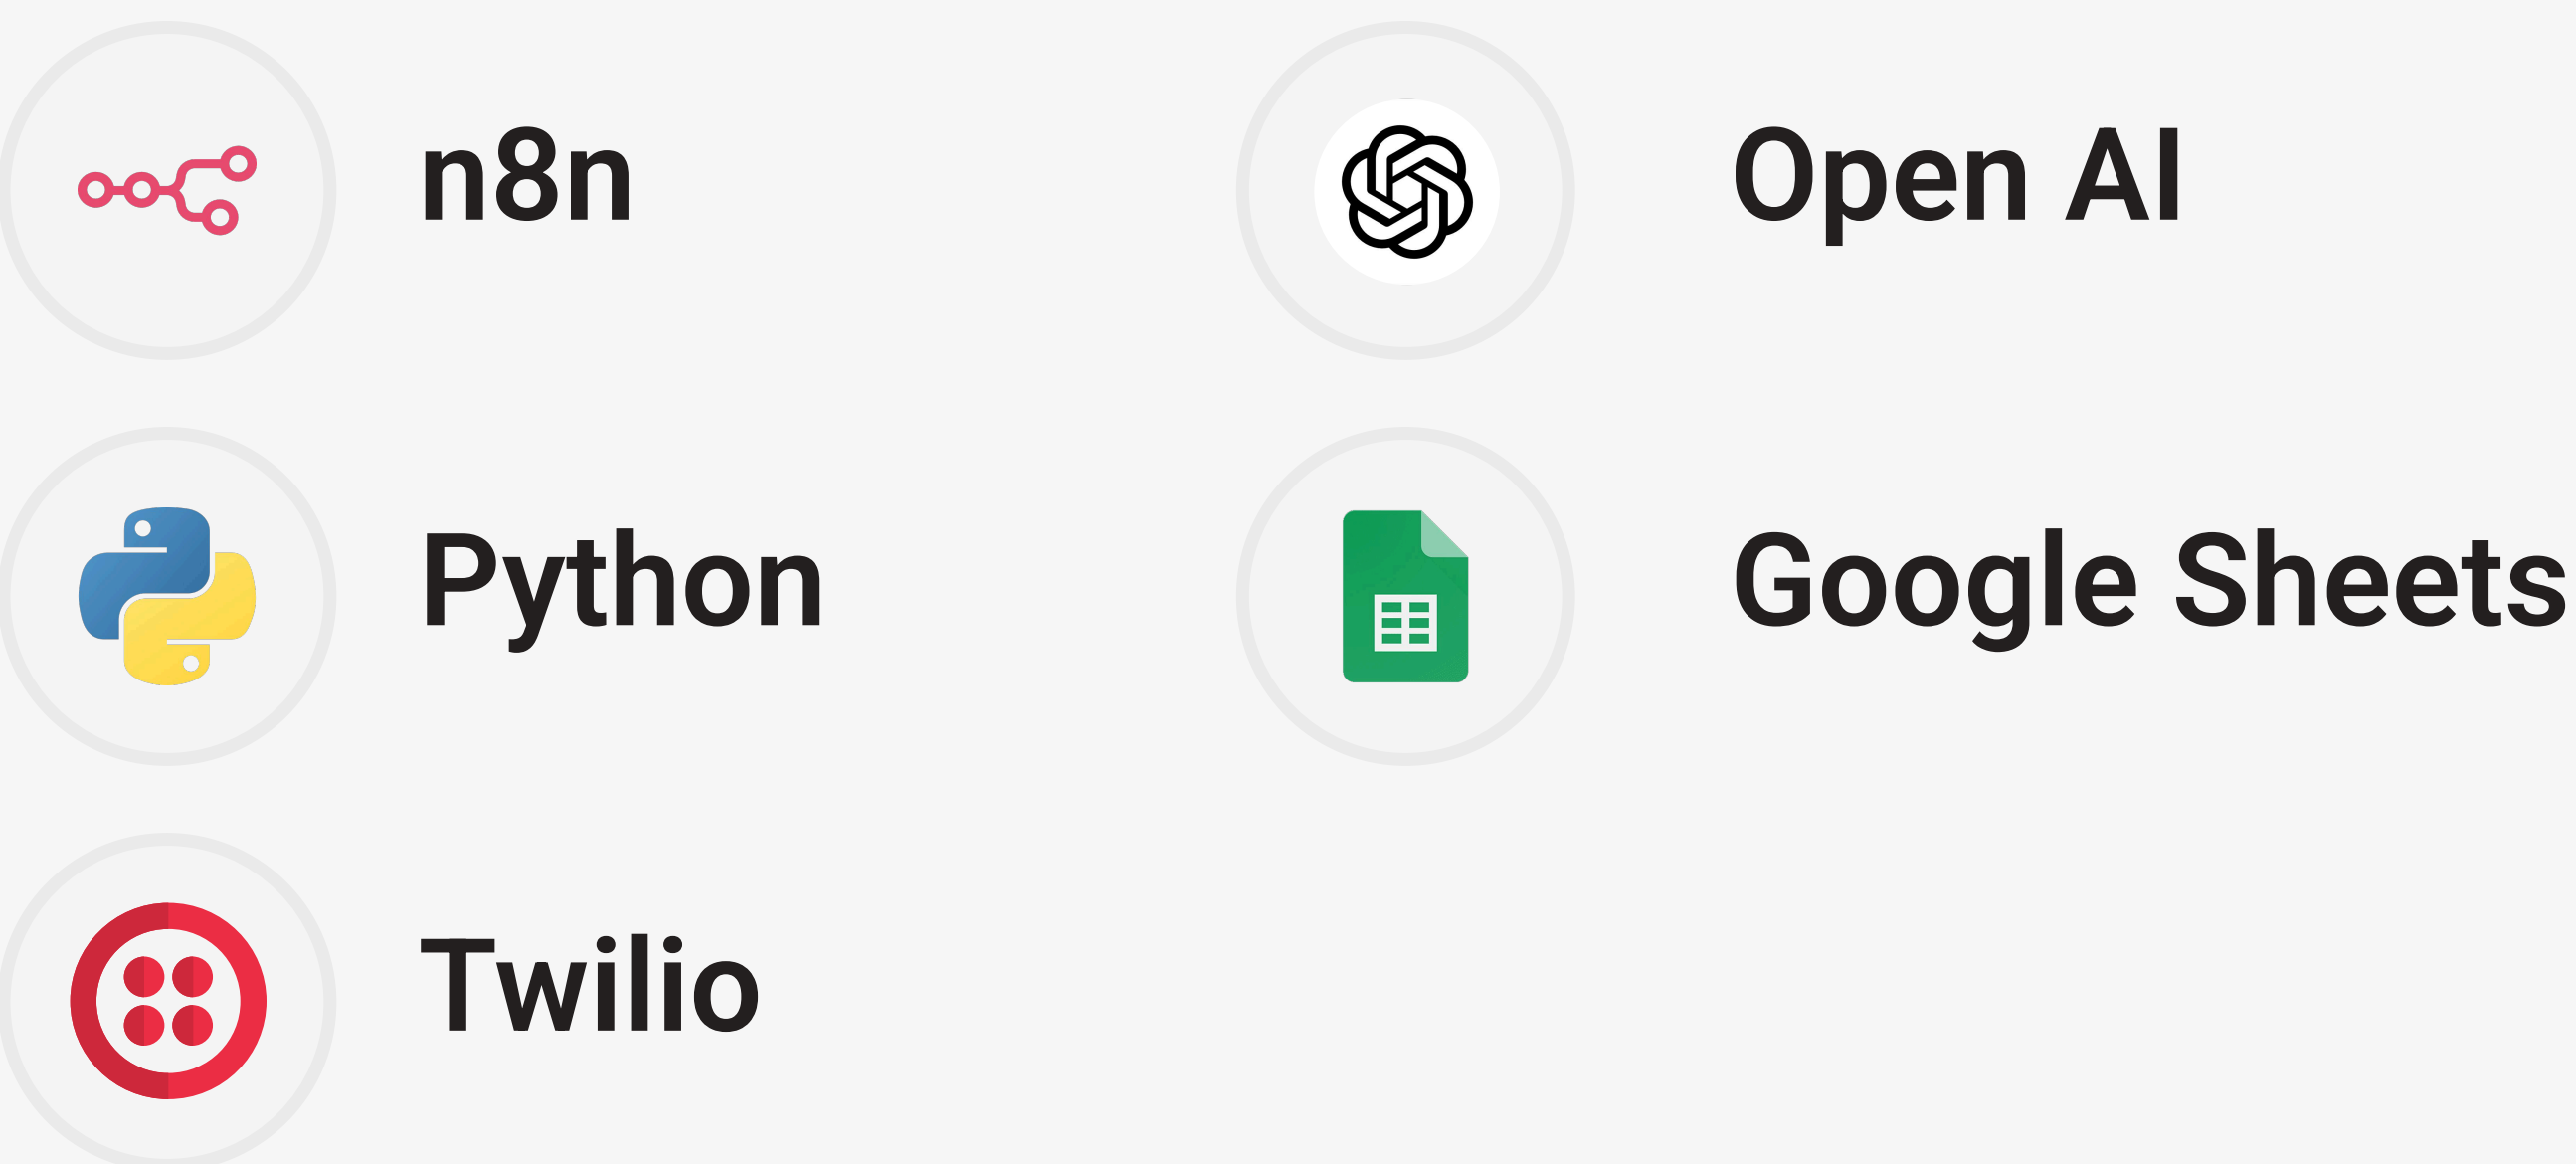

AI- Powered Webbot Workflow with Gmail & OpenAI Integration

Workflow Automation Specialist

Created an AI-driven webbot in n8n that automates client interactions from start to finish. The system receives requests vis webhook, checks and updates user data, uses Open AI GPT for intelligent responses, stores conversation mempry, and replies to users via Gmail with smart labeling

Tech Stack

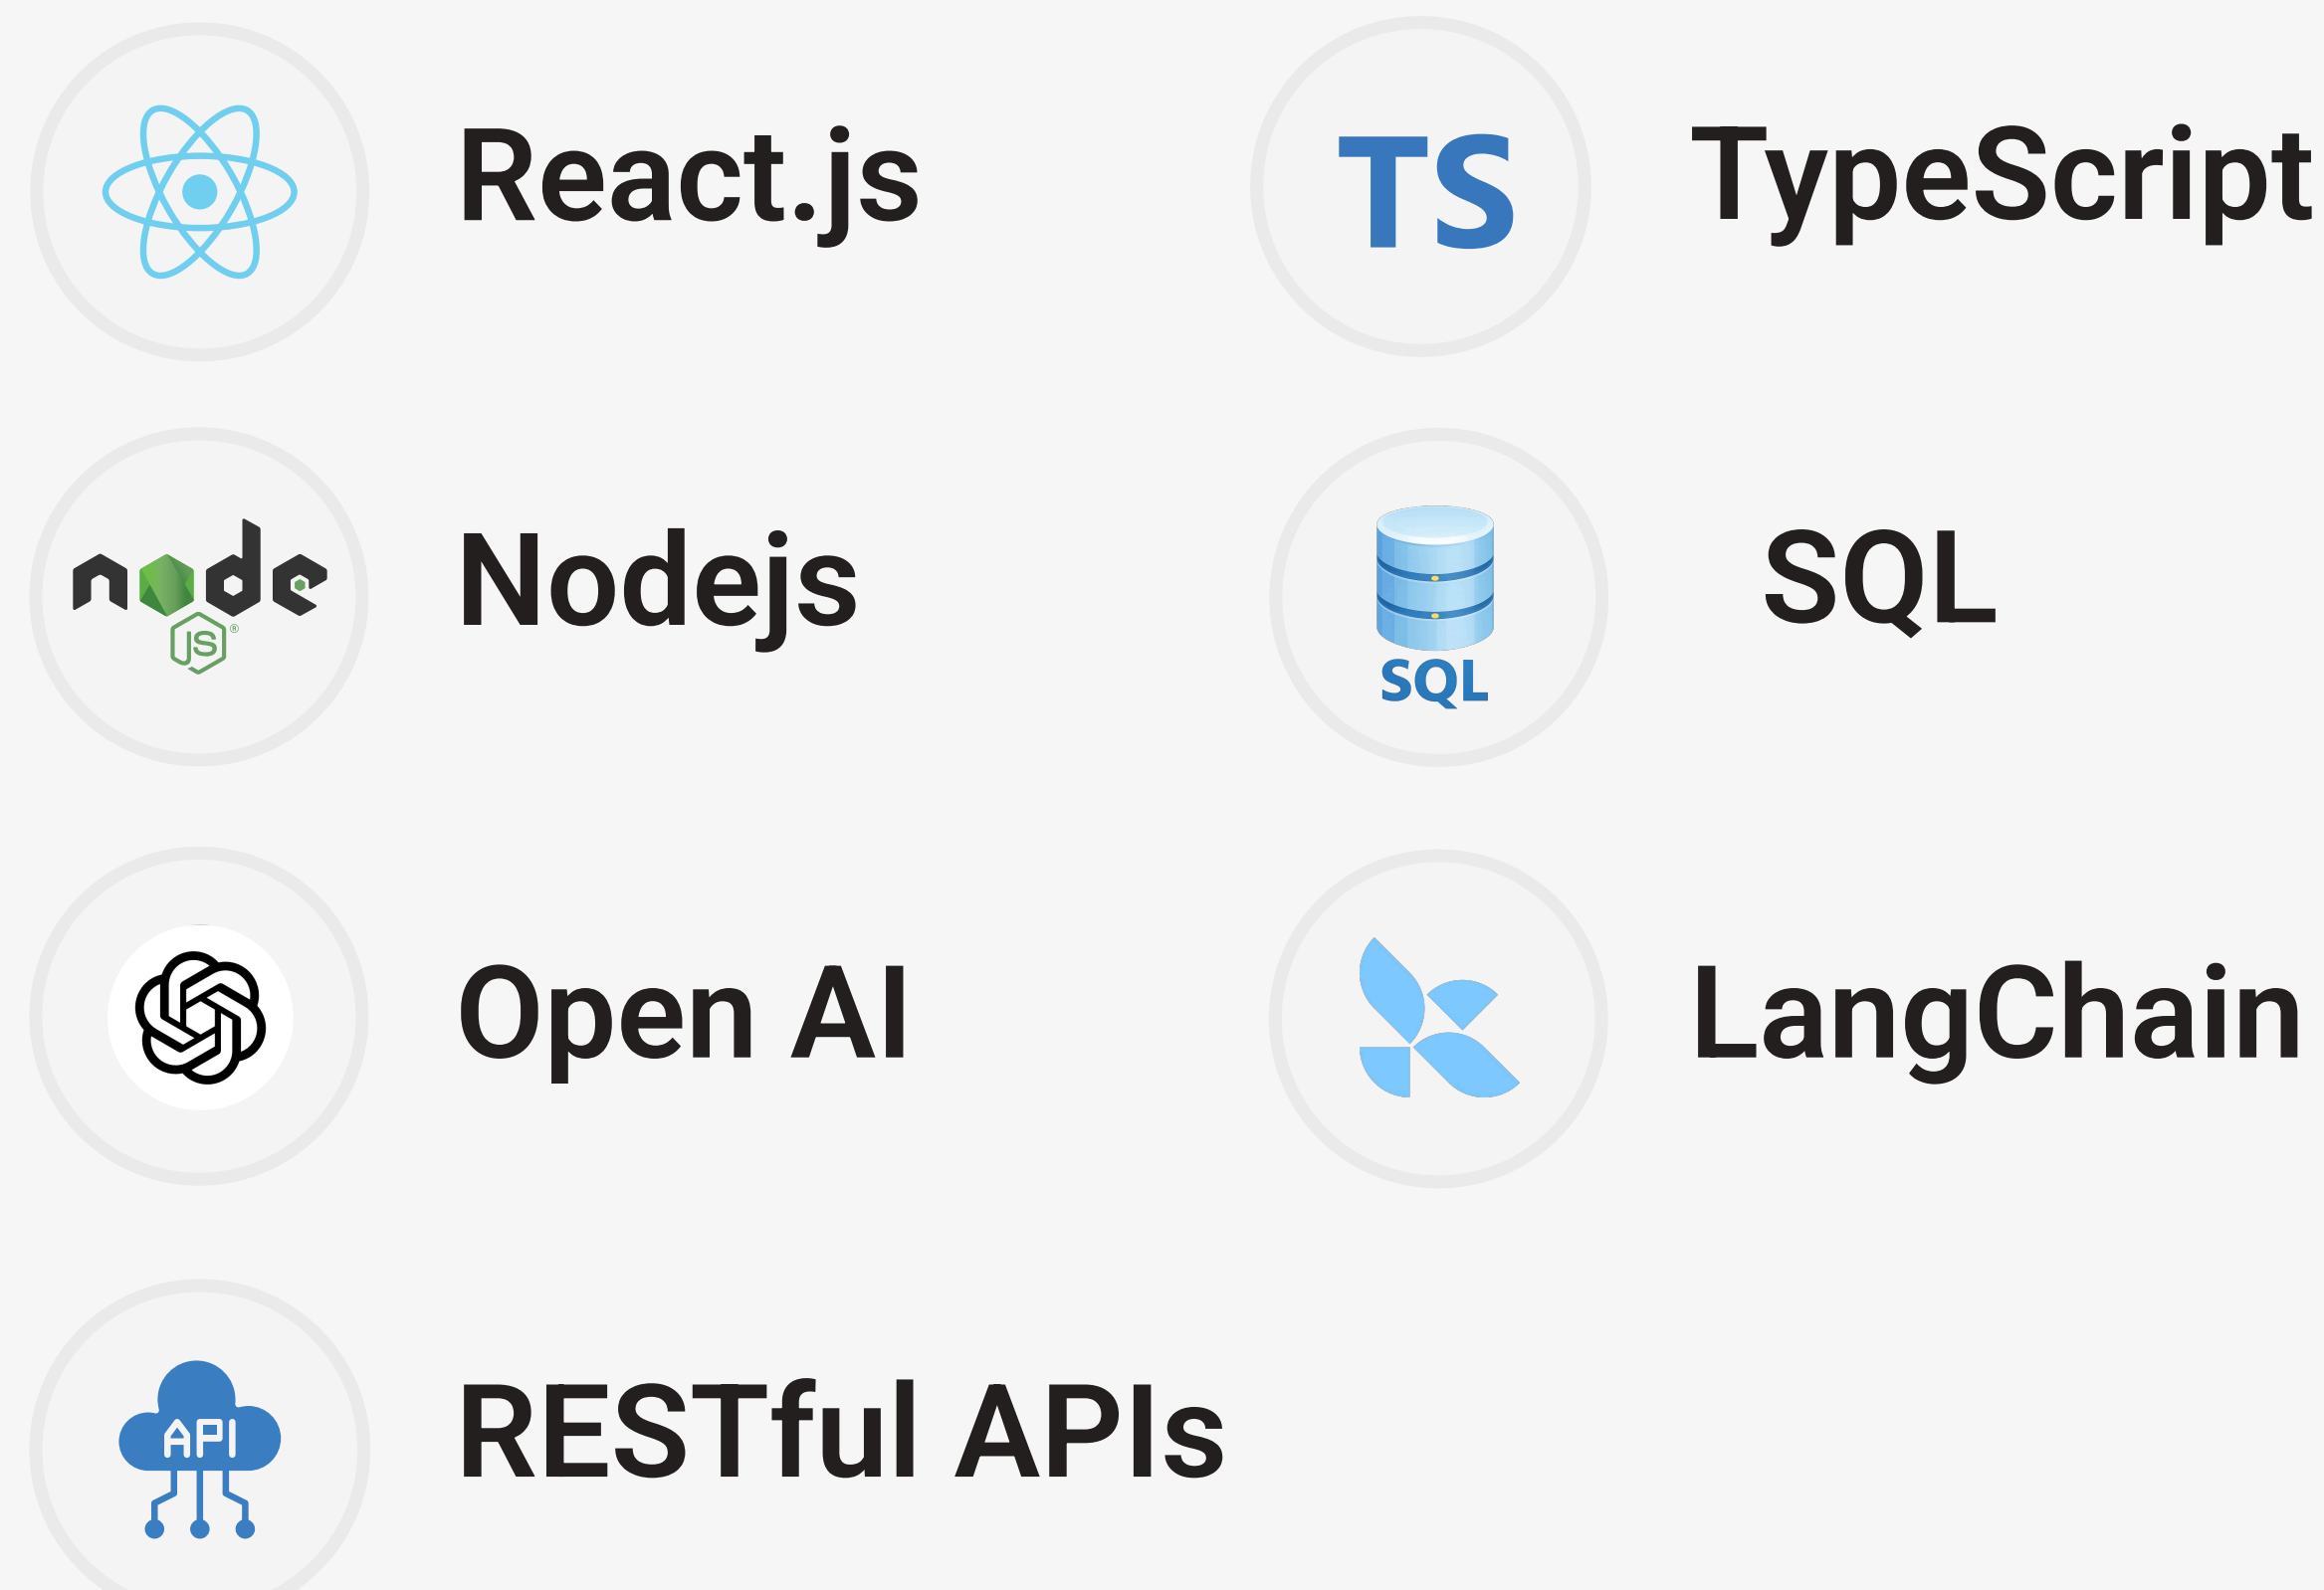

The Auto Parts Shop (E-commerce Platform)

AI Engineer | Full Stack Developer | LLM & Agentic Workflow Engineer

Worked on a large-scale automotive e-commerce product catalog platform with vehicle-based product search, category browsing, product discovery flows, and API-driven catalog management. Built and optimized scalable frontend components, responsive product listing pages, and smooth search experiences for users finding parts by make, model, submodel, engine, category, and brand. Focused on improving catalog usability, performance, backend API integration, and AI-ready product discovery workflows for a high-volume e-commerce platform.

Tech Stack

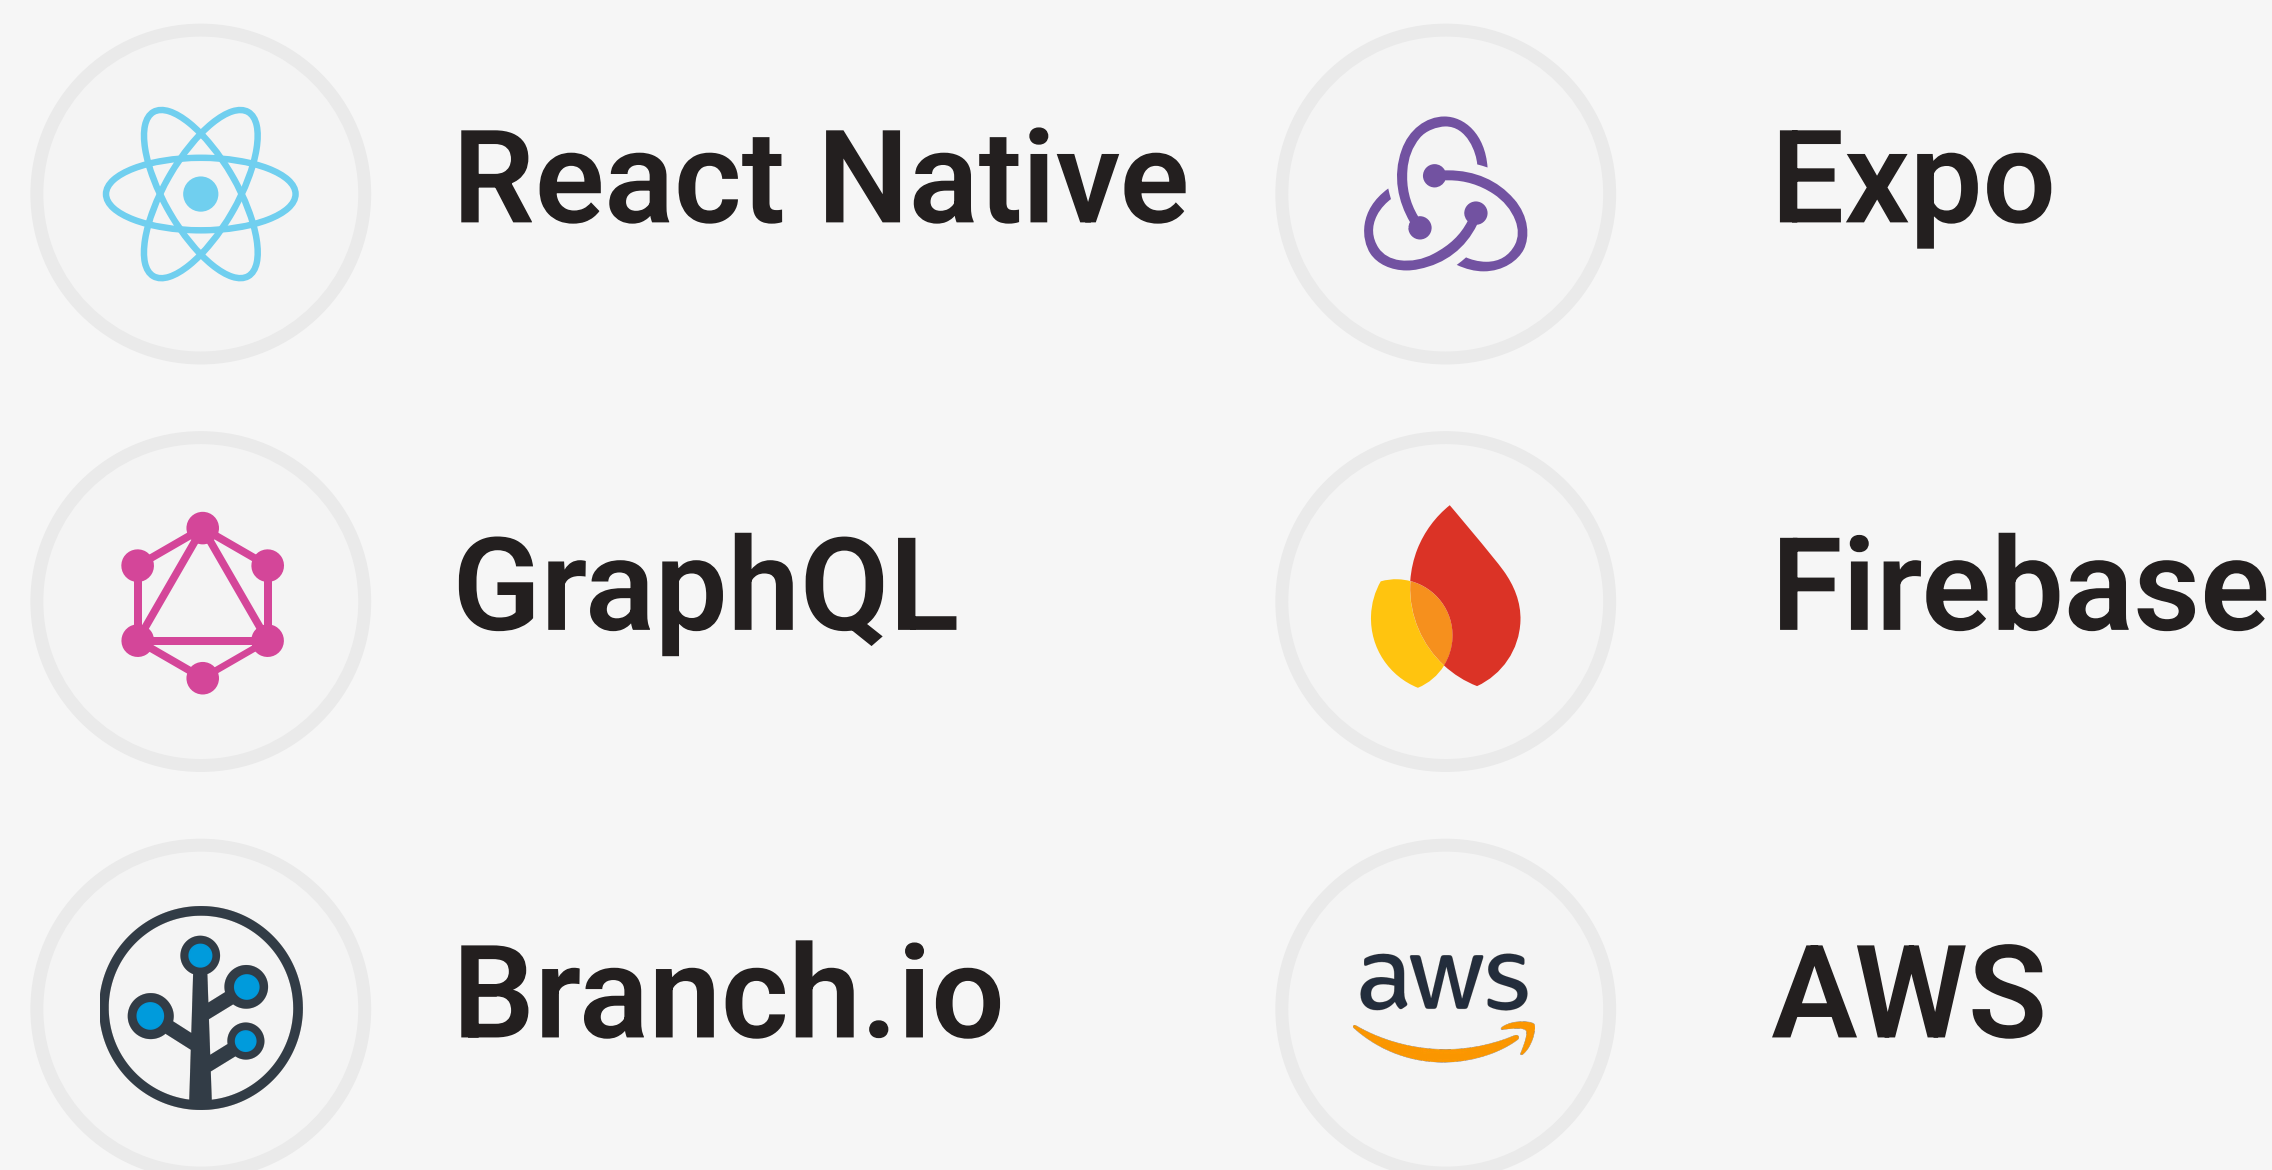

The Party Platform UAE - Mobile Application

React Native Developer (App Developer)

The Party Platform is a user-friendly event management app designed for the UAE, helping users easily discover and book vendors for birthdays, weddings and corporate events. It Streamline communication, booking and event planning in one place, The Platform has successfully improved user engagement and simplified event coordination for hundreds of active users.

Tech Stack

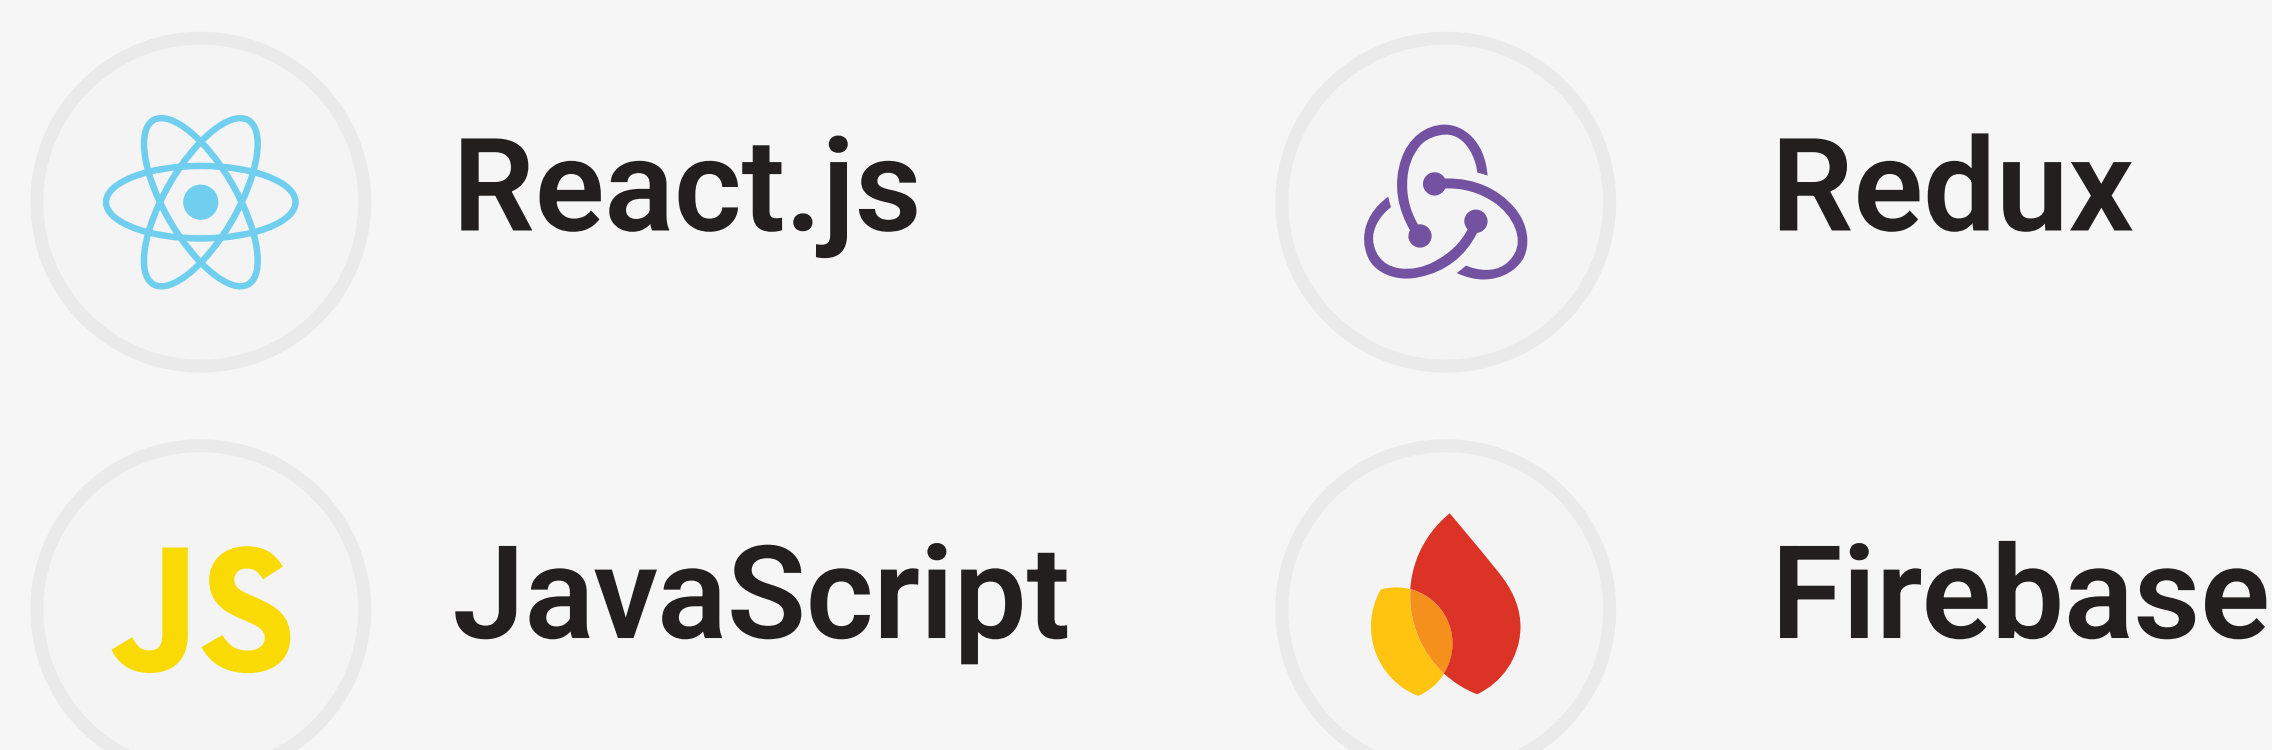

Restaurant Service Management

Senior Full Stack Developer

Designed and built a real-time order tracking system for restaurant management. Developed reusable UI components, enabling faster future feature rollouts. Integrated a secure API framework to handle real-time menu updates and order processing.

Tech Stack

Staffing Agencies

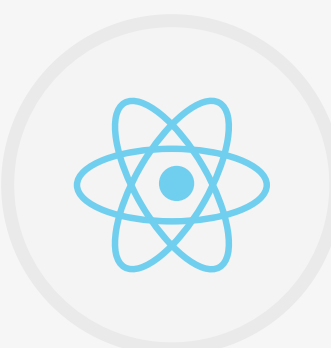

Senior Full Stack Developer

Developed a candidate management platform with advanced filtering and search functionalities.

Built a secure authentication system using JWT to enhance data security and access control.

Integrated automated reporting tools, reducing manual data entry efforts for HR teams.

Tech Stack

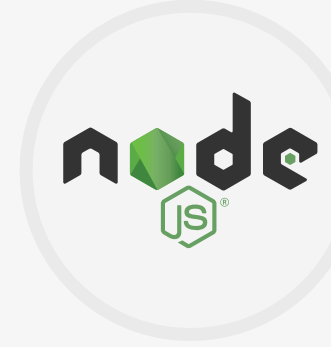

React.js

Redux

JavaScript

Node.js

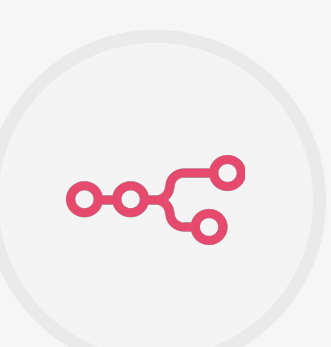

MongoDB

Voice Agent Tools Workflow (n8n)

Automation Engineer

Developed a voice automation backend in n8n to power intelligent voice agents. The system receives call/webhook events, processes transcripts, understands intent using AI, and returns real-time responses or triggers business actions.

Tech Stack

n8n

PostgreSQL

Docker

Open AI

Python

Twilio

Realtor

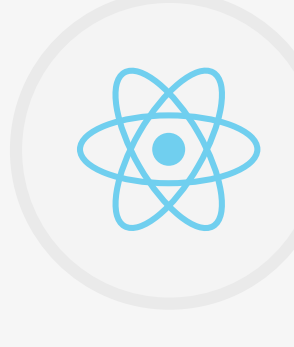

Senior Full Stack Developer

Created a real estate platform, increasing user engagement and transaction rates.

Designed an admin dashboard for property management, improving operational workflow.

Optimized frontend performance, ensuring a smooth and responsive user experience.

Tech Stack

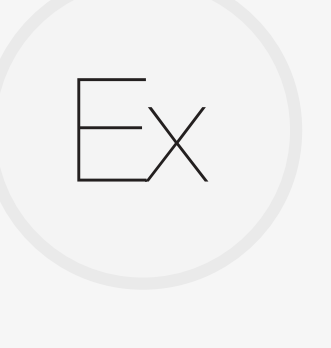

React.js

Redux

Node.js

Express.js

PostgreSQL

Developer Hiring Form Automation

Full Stack Automation Engineer

Built an end-to-end recruitment automation workflow using n8n to streamline developer application handling from form submission to recruiter notification. The system collects candidate details, manages resume uploads, stores CV files in Google Drive, syncs structured applicant data with Notion, and sends real-time updates to recruiters through Email and Slack. Integrated OpenAI to support automated candidate screening, application summarization, and recruiter-ready insights, helping reduce manual review effort and improve hiring workflow efficiency.

Tech Stack

n8n

Open AI

Python

Node.js

Docker

Notion API

Python

<What I Bring/>

Why I’m a Strong Fit

- Available to work in CET/CEST hours.
- Strong analytical and problem-solving skills, ensuring efficient code optimization.
- Adept at collaborating with cross-functional teams to deliver seamless digital solutions.
- Passionate about adopting emerging technologies to enhance application functionality.
- Track record of delivering projects on time with high-quality standards.

<About/>

Education

- March 2009 - April 2011
Bachelor of Computer Application
Punjab Technical University (PTU)
- May 2011 - March 2014
Master’s of Computer Application
Punjab Technical University (PTU)
